

Did you know?

Ten percent of home fires in Minnesota from 2013-2017 were caused by heating devices.

Most home fires occur in the winter and peak in January.

Most Minnesota heating fires occur in fireplaces and chimneys.

HEATING SAFETY

- **Keep portable heaters three feet from anything combustible.**
- **Turn portable heaters off when leaving the room or going to sleep.**
- **Never use your oven to heat your home.**
- **Have your home heating system and chimney cleaned and inspected annually.**
- **Make sure your wood stove is properly installed and ventilated.**
